

MicroStrategy on Azure

Welcome to MicroStrategy on Azure!

This machine is a single windows 2016 Virtual Machine with MicroStrategy Secure Enterprise installed on it. There are several steps that need to be taken before full functionality of this machine can be achieved.

License Key

A license key is required for the 30 day free trial. Visit this webpage, fill in the required details and download the platform. The trial license key will be emailed to the provided email address. You will not need to run the MicroStrategy installer. MicroStrategy Secure Enterprise is already installed and configured on this Virtual Machine.

<https://www.microstrategy.com/us/get-started/enterprise-evaluation>

Once you have the key, open up the license manager and go through the steps for updating a license key.

Mobile Configuration

For mobile applications to work, you will need to modify the url's in the mobile configuration files. You will need to replace the string "mstr-7-18" located in the mobile configuration files with the resource group dns name you provided when provisioning the machine.

Mobile configuration file locations

C:\Program Files (x86)\Common Files\MicroStrategy\Tomcat\apache-tomcat-8.0.30\webapps\MicroStrategyMobile\WEB-INF\xml\mobile

Passwords

The password for the mstr user is located in:

C:\Program Files (x86)\Common Files\MicroStrategy\Tomcat\apache-tomcat-8.0.30\webapps\MicroStrategyMobile\VisFramework\ngm\node_modules

Please change this password immediately upon provisioning of the machine

Further Documentation

If you have any further questions, please visit the MicroStrategy community website at <https://community.microstrategy.com>
